WEEKLY EPITAPH

Six-Page Edition.

TOMBSTONE, ARIZONA, FEBRUARY 27, 1882

Mines and Mining.

From the Prescott Courier Mr. B. C. Smith, of Lynx creek, was in town yesterday. He said that he had not yet started his hydraulic mine. The weather has been so cold in the mountains, that the water has not been coming down in sufficient quantities to make much headway. With the coming of warmer weather these mines will be started, and the prospects are excellent for a long continued yield.

A party of mining capitalists have been doing the Black Hills range recently.

Mr. Kelly showed us to-day a profile map of h's mammoth lead on our artistic fellow-citizen, Col. Bigelow. This ledge is, in extent, one of the largest on this coast, having an average ascertained width of two hundred feet, and containing through-

Buffum has recently purchased some promising mining properties in the Dosoris camp. Hope he'll grow rich out of his mines, as he deserves to be, for his large investments in them, and his having never yet refused a poor man a grub stake.

John Reese believes from what he has learned from his partners that the sale of the Burro mine has been con-

Work on the erection of a building for the Arizona Queen Co.'s mill on Groom creek is progressing slowly on account of the difficulty of procuring teams to haul lumber. The snow in the Groom creek gulches is said Yellow Jacket, who is a Golden to be from three to four feet deep Terra to Hale and Norcross, bet that everywhere.

on the Gray Eagle mine on Groom creek, and have eighteen inches of free gold ore from top to bottom.

Mr. T. Bullock leaves to-day for has examined the mines of this seccondition of the mountain roads would permit. The other day he was three hours in making the trip from the head of the Hassayampa to Lynx creek through the deep snow.

Tip Top machinery has broken, necessitating the stoppage of the mill, and that the superintendent has gone to San Francisco.

Geo. W. Curtis says the Vulture mill was running when he came through, on good ore.

The Perry mine, on the Hassayampa, is under recent developments brokers think the wreck quite a other 75. The Del Pasco is less than looking better than ever. The Perry strike, a regular Homestake for kindis a good mine and has a brilliant ling wood.

Globe District Hines.

We are glad to be able to report activity in and excellent promise from the mines of the South Pioneer region. Upon all of them work is being pushed night and day with splendid promise. The South Pioneer has been producing the same rich ore as heretofore, following on the north drift of the 100-foot level, a strong body of high grade ore all the way, and at 51 feet striking a vein of almost solid mineral three feet wide. The vein matter seen and examined by the editor of the Chronicle is full of free silver, and in places of the most beautiful fine wire silver. It is enough to make a poor pencil driver sick to look at the seemingly inevitable promise of wealth beyond in this mine without having an interest in it. The steam pump on the South Pioneer easily controls the water, the 20-foot sump holding the water for three and a half days; it is ttherefore necessary to pump only twice a week. This is a large saving to the company compared to the windlass hoisting. The ore now being taken from the Pioneer East is a pure black sulphuret aud remarkably rich.

The assays made by E. O. Kennedy, February 16th of the ore-taken from the new strike in the South Pioneer, are as follows: No. 1, 850 ozs, \$1,099.01; No. 2, 675 ozs., \$872.70; No. 3, 890 ozs., \$1,150.68; No. 4,912 ozs., \$1,179.12; No. 5, 1350 ozs., \$1,745.41.

The Howard company have broken ground for their main working shaft. It will have two compartments 4x4 each. Their hoisting works are on the way and will arrive the same time as those of the South Pioneer. The saw mill owned jointly by the companies, is expected to reach Casa Grande in two weeks, it having been shipped from Cincinnati several days ago. Work on the road to the timber is being rapidly pushed with a force of fifty men, and will be finished in about five weeks. When the quartz-mills are erested this will prominent camps in the territory.

Train Wrecked.

Prom the Dally Star, Feb. 25. On Wednesday as a freight train was coming down the grade from Stein's Pass one of the brakes gave way and the forward truck of one of the cars rolled out from underneath, causing eleven flat cars to be ditched and badly smashed. One brakeman was injured and he was brought to

Tucson last night. Col. Bean immediately went out of republican boots. with a wrecking train and in a short time the track was clear again.

TROUBLE AT THE NEW YORK EXCHANGE.

Policeman's Description of the

Affair. from the Daily Stock Report

This morning the janitor at the reporter that when he opened the doors he found everything in confusion, the chairs and tables overturned, desks smashed, and the bulletin boards were found all torn in pieces lying about the floor in grand confusion. It seems that during the night there was some trouble between Alice and Julia, which was taken up by the Boulder portion of the company, who were well seconded by the lady members of the firm. A policeman who happened to be passing by says it was a regular Bonanza, Chief-ly owing to the interest exhibsted by the ladies, he says May Belle called Lady Washington a Hussey, Silver mountain, the handiwork of and was immediately Set(a)t-on by Amie, who seemed Benton making Hortense do something to provoke Belle Isle, who had said she didn't Caribou for the whole crowd, the Climax was reached when the Northout ore of sufficiently high grade to be profitably worked.

We are informed that Hon. W. M.

gan; the Miner Boy tore the American Flag and threw the Golden Stripes in the face of Martin White, who pitched into the Little Chief from Hibernia that wears the Shamrock, who, like a Navajo Savage, went for Father De Smet (a quiet, rich cld man), saying, you're enough to make a Bassick, I'll Belcher in the jaw, gave the Bullion Mammoth

a Tip Top blow upon his Buckeye. Young America, the Ward of Wells Fargo, now joined the Syndicate in Confidence, and planted a blow on the C(h)ollar or Kossuth, who got in a rap on Goodshaw, which drew first blood.

Yellow Jacket, who is a Golden Phil. Sheridan would not Ophir to The Messrs. Robert have recently fight Robinson, the Trojan. As no finished sinking a forty foot shaft one felt disposed to take up the wager, the uproar gradually died out. and the poliman plodded his weary beat, very much refreshed by the episode; he says he greatly feared the Chicago, New York and London. He animals would get loose at one time reach, and she never cried out to the as the Wales and the Leviathan were tion so far as the almost impassable lashing themselves into a rage, at the same time the Bul-wer goring the Red Elphant, while the Tiger and Leopard were holding a love feast over each other's ears, the Scorpion bit the Moose, and the Black Hawk We learn that something about the buried its talons in the tender bird or Paradise, but the cages proved in 1871, and has yielded over \$30,strong enough to hold these zoological pets of our brokers. The janitor says there was considerable Deadwood lying about the floor, and the State Lines were in a dreadful snarl, straightening them out,) some of the tunnels, ono 60 feet in length, and the

Product of Eureka. From the Ruby Hill Mining News.

During the past nine years Eureka has produced in money \$28,496,499 .-If this amount were converted into \$20 gold pieces its weight would aggregate over 52½ tons. This would require five 'C. P. flat cars to transport it, and it would be a mammoth load for two of our 20-mule teams prairie schooners with three wagons. If coined into standard dollars the weight would reach 8394 tons, and it would require 84 flat cars to bear up the weight; while 820 mules and 123 wagons would represent its tonnage on a prairie schooner standard of 40,000 pounds to the team. These figures represent only the coin production of the great Base range, and do not include the several million dollars' worth of lead that have been turned out by the district.

The Robbed and Shivering Comstock This has been, in point of cold, the severest winter ou the Comstock for seven years. The cold has been continuous for nearly three months, and the consequent fuel expense is nearly double that of ordinary seasons. Dependent, as our people are, on the that each winter has been colder than tender mercies of the Central Pacific its predecessors. The present winter and Virginia & Truckee railroad com- has certainly been remarkable for panies for the means (outside of the saloons) of keeping warm, the winter has been severe on all classes. With wood \$15 a cord and coal \$22 as to cause its appearance to be and \$25 a ton, a comfortable state of looked on as a phenomenon, and it temperature indoors is a high-priced has fallen to a greater depth than luxury. Wood at Reno can be had ever known before. In this city for \$5 a cord, while Rocky Mountain | there has been an unprecedently procoal at the mines, in Wyoming territory, but a short distance from the railroad and in direct connection with it, is but \$2 a ton. The bulk of the balance charged the monopoly-ridden Comstock goes into the bulging coffers of the railroad barons.-Virginia

A Political Bet.

From the Phenix Herald. The two extremes in politics, Hon. C. H. Gray, of Phenix, and Secretary Gosper, happened to meet the other day at the stand of a boot-black and, undoubtedly be one of the most while discussing the coming campaign for delegate to congress, it was agreed between them, that, in the event of the election of a republican to congress the Hon. Mr. Gray should black the boots of Secretary Gosper, publicly, in the town of Phenix. If, however, a democrat shall be elected, then Secretary Gosper is pledged to black the boots of Hon. Mr. Gray. in the same place and manner. Of course we believe that Mr. Gray will have the pleasure of blacking a pair

Deeds for Bonds, Mining Deeds and

A Woman's Business Success. N. Y. Letter to Boston Traveler

An immense business success has been reached by the proprietress of the largest and most respected Gerwas the largest sum offered for it. Hoping to find a more gener us purshort time, but no one wanted the little journal. Its editor was a cleyer writer and a judicious selector of news, and month by month the popularity of the little sheet grew and grew, and at last, after a year or two, she relinquished the plan of parting with it at all. She married the editor, but she alv ays kept the business of the publication under her own care, learning by each experience how to purchase paper with more intelligence, employ work people, manage money, and yet find time to watch over and direct the education of her boys and girls. After a time she became rich, fell into the habit retired office daily at 10 o'clock, to and two Mexican children. return again at 3 in the afternoon to an elegant home, from which her accomplished daughters were happily married, and from which her honored sons went forth to homes of their own. She has erected with her earnings one of the handsomest buildings in New York. She recently gave \$50,000 to an old ladies' home (German), and during all these years of prosperous toil she has never been prosecuted or oppressed by men. Indeed they have not even desired to rise in her path or stand in her way, and she has never ceased to be a lady of high breeding and sweet womanly sympathies. Der Staats Zeitung is the leading German paper

Mining Jots.

world to ask if she might.

and Der Zeitung building is a most

beautiful monument of woman's ca-

pacity to do the very best bread-

winning work in the world, provided

she gives her mind, heart and enthu-

stasm to its accomplishment. This

tender mother, who must needs pro-

yide for her young, wrought with

such materials as she had within

From the Democrat, Feb. 21. Among the test mines in this country are the War Eagle and the Del Pasco, in Pine Grove Mining district. The former was discovered 000 in gold, and that from very imperfect machinery. The ledge will average three feet in width, and the last run went over \$30 per ton. It is opened by several shafts, the (he was afraid they would break in deepest being 90 feet, and by two vielded on the surface, quartz that went \$300 per ton, in arastras. The mine has produced between \$30,000 and \$40,000. At a certain depth the quartz ran into sulphurets, which are the richest ever struck in northern Arizona, some of them assaying over \$300 per ton, gold and silver. As depth is reached on these properties, the percentage of silver increases, and they will, no doubt, eventually run into silver entirely.

Tom Brown came in from the Pearless mine in Turkey Creek, last evening. He and his partner, Mr. Brady, have been putting up a comfortable residence, and as soon as the snow disappears will resume work on their mine. The Peerless is one of the most promising claims in Turkey Creek district, and has yield-

ed some very high grade ore.
Mr. McAuliffe is still prosecuting work on the American. He has six men employed, and is opening the property in good style.

Is the Climate Changing?

From the Dally Report.

It is the opinion of many old residents that the climate of California has been gradually undergoing a change in the past twenty years and its severity. Snow has fallen in various portions of the state where the occurrence of snow is so seldom longed spell of cold weather, the like of which that old humbug, the oldest inhabitant, does not recall to his remarkably elastic memory. There have been individual instances of days of as cold weather as have been experienced this year, but there is no record of so much continuous cold weather. All the records and evidencies point to the fact that the climate of this state is not what it was twenty years ago, and that it is gradually assuming more the character of the climate of the eastern

The Hostiles in Sonora.

TOMBSTONE, COCHISE COUNTY, ARIZONA, FEBRUARY 27, 1882.

The Mexicans still consider the Apache invasion a serious matter. The efforts made by the government man daily paper in New York. This to drive them back to American soil lady was left a widow with six small have proved futile. The states of So-New York Mining Exchange told our children, and a little newspaper nora and Chihuahua are so large that which she desired to seh. Only \$500 it is very difficult to get at them, and their incursions upon isolated settlements are quite common. The dischaser later on, she persuaded its trict of Oposura is almost depopula-editor to remain at its head for a ted by the Apache depredations, and most of the stock driven off. The situation is deplorable.

The hacienda of Guacora, belonging to Don Policarpo Moreno, was attacked, and ninety head of animals taken therefrom. There was also an evident intention of assaulting and taking the place itself, which was only prevented by the arrival of timely help, which obliged the Indians to retire, but in good order.
On the 18th of January about forty

Apaches believed to belong to Jul's band, attacked the mining town of Dolores, in the Sierra Madre, about 250 miles southeast of Chihuahua, killing three persons and woundi g of driving down to her handsome and six; also taking captive one woman

From the immediate vicinity of Cumpas they took a considerable number of horses, and seriously wounded Messrs. Manuel Arvizu and J. M. Moreno, who assert that in the fight they saw two Americans figuring conspicuously as chiefs of the

Oscar Wilde, it is rumored, will shortly appear at the Frisco Minstrels opera house, in a song and dance entitled The Big Sunflower .- N. Y Sunday Courier.

A Texas judge knocked six months off a ninety-nine years' sentence in order to show the prisoner's friends that he was willing to give him a chance.-Augusta Chronicle.

PILES! PILES! PILES! A Bure Cure Found at Last-No One Need Suffer!

A sure cure for blind, bleeding, itching and ulcerated piles has been discovered by Dr. William, (an Indian remedy), called Dr. William's Indian Ointment. A single box has cured the worst chronic cases of 25 or 30 years standing. No one need of 25 or 30 years standing. No one needs suffer a minute after applying this great soothing medicine. Lotions, instruments and eluctuaries do more harm than good. William's ointment absorbs the tumors, allays the intense itching, (particularly at

allays the intense itching, (particularly at night after getting warm in bed.) acts as a poultice, gives instant and painless relief, and is prepared only for piles, itching of the private parts, and for nothing else.

Read what the Hon. J. M. Coffinberry, of Cleveland says about Dr. William's Indian Pile Ointment: I have used scores of Pile cures, and it affords me pleasure to say that I have never found anything which gave me such immediate and permanent relief as Dr. William's Indian Ointment. Ointment.
